Capabilities Statement

Integrated Civil & Municipal Construction for Public Infrastructure

$1.59M+	0	0
Managed in municipal construction contracts	Contract defaults	Failures to complete awarded work

COMPANY OVERVIEW

Farier Consulting and Contracting, LLC is a Texas-based civil and municipal construction contractor specializing in roadway, concrete, and site development work for public-sector and commercial clients. The company provides single-team project management across excavation, utilities, concrete placement, and asphalt paving, allowing agencies to coordinate multiple construction disciplines through one accountable contractor. Farier is based in Central Texas and positioned to support municipal, state, and federal infrastructure improvement projects.

CORE COMPETENCIES

- **Highway, Street, and Bridge Rehabilitation**: asphalt resurfacing, pavement patching, grading, and surface restoration for public roadways
- **Concrete and Civil Site Construction**: poured concrete foundations, sidewalks, curbs, and structural slabs supported by excavation and drainage
- **Commercial and Public-Facility General Contracting**: project coordination, subcontractor management, permitting, and closeout for government facilities
- **Site Preparation and Civil Development**: excavation, grading, and utility-related site work for vertical and horizontal construction

DIFFERENTIATORS

- Recently qualified to perform as General Contractor in addition to established subcontractor experience, broadening direct-award eligibility for public agencies
- Line-item bidding paired with named project management, daily site logs, and weekly photo progress reporting
- $1,500,000 in bonding capacity with a Central Texas presence for responsive mobilization
